

Application of a Discontinuous Petrov-Galerkin (DPG) Method to the Stokes Equations

Nathan V. Roberts

Center for Predictive Engineering and Computational Sciences

Institute for Computational Engineering and Sciences

The University of Texas at Austin

Joint work with

Denis Ridzal, Pavel B. Bochev, Kara J. Peterson, Christopher M. Siefert at Sandia, and
Leszek D. Demkowicz at UT Austin

5-6 October 2010

Outline

1 Introduction

Stokes Formulation
